SD P2 — Execute and Confirm Release

EPS academic MVP | simulated VND | analysis-level interactions | time flows downward

Decision and exclusive full-amount reservation are saved before the external call. Timeout keeps attempt UNKNOWN and the reservation; A5 queries the original reference without a new transfer.

Blue: EPS boundary/control. Gray: actor/entity/external mock. Yellow: business constraint.

Solid filled arrow = request; dashed open arrow = async event or gray return. Frames show guarded alternatives/options.
