SD A5 — Reconcile Pending Transactions/Retry Confirmed-Failed Transfers

EPS academic MVP | simulated VND | analysis-level interactions | time flows downward

Unknown results are query-only. Only final failure proving no movement permits retry. Callback/query races share one atomic confirmation path; no manual success.

Blue: EPS boundary/control. Gray: actor/entity/external mock. Yellow: business constraint.

Solid filled arrow = request; dashed open arrow = async event or gray return. Frames show guarded alternatives/options.
